# V-CONCEPT, A REVOLUTIONARY INVENTION

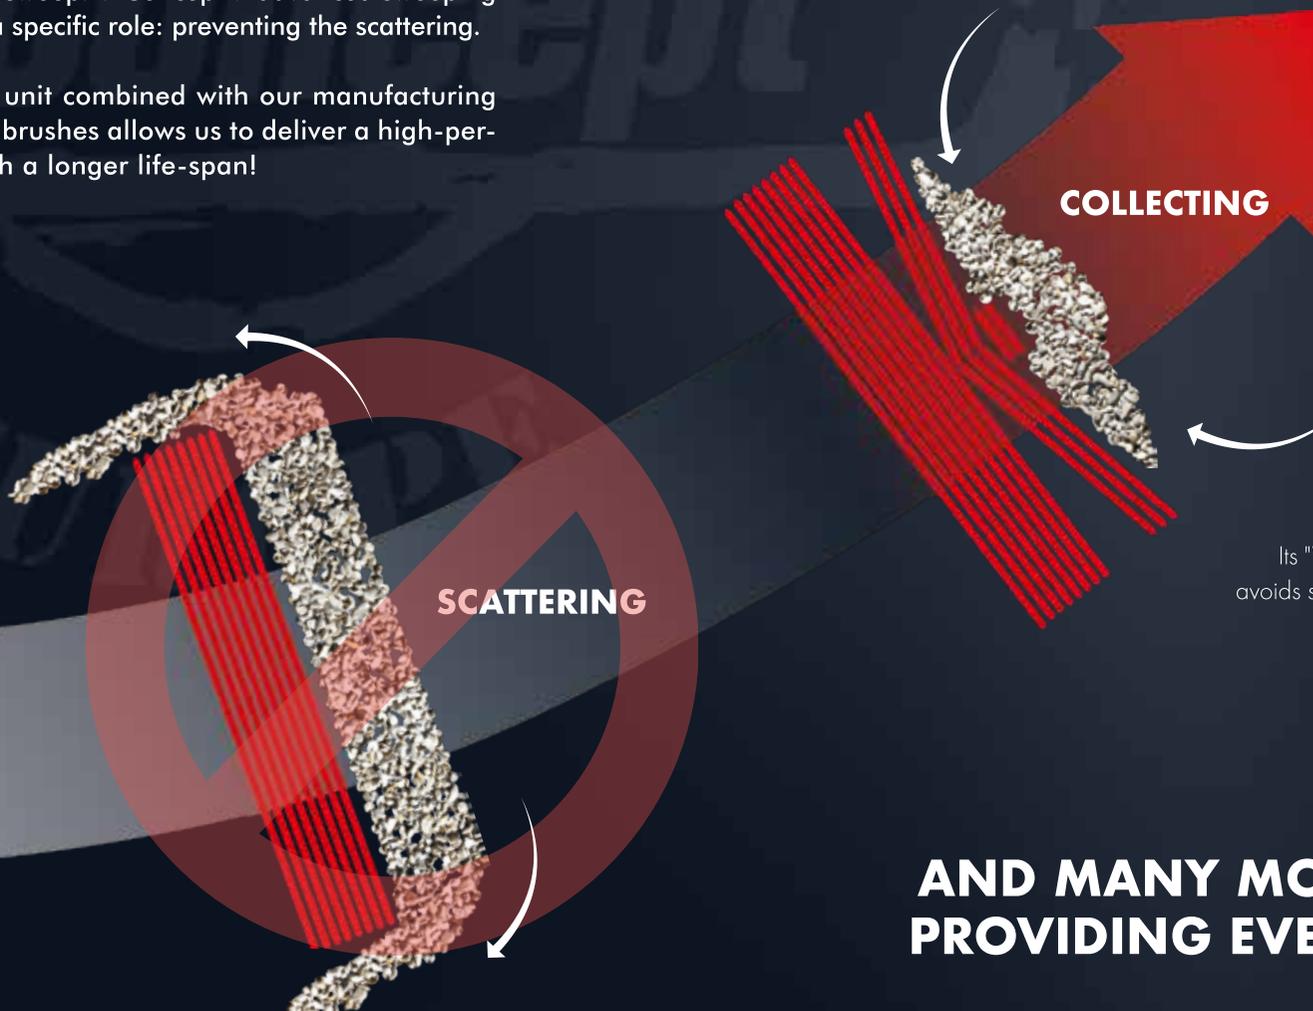

ACTISWEEP V-CONCEPT is a patented technology design for large amounts of waste or materials. It has V-shaped rows of brushes collecting rubbish into the centre of the sweeper, thus allowing a faster and more efficient sweeping.

More than 10 years of development and experience are obvious in many details. Quality, functionality and accuracy are key elements for Actisweep. V-Concept® advanced sweeping technology aims at a specific role: preventing the scattering.

Our control quality unit combined with our manufacturing process for special brushes allows us to deliver a high-performance range with a longer life-span!

## ASSENTS :

- ⌒ Fast sweeping of all sorts of materials, on any type of floor
- ⌒ Very low dust emission
- ⌒ Allows to sweep up large amounts in a single time

**"COLLECTING  
INSTEAD OF  
SCATTERING"**

Actisweep® unique V-Concept®, allows to collect rubbish into the centre of the sweeper. Its "V-shape" system prevents rubbish dispersal and avoids side windrows!

**AND MANY MORE ARGUMENTS  
PROVIDING EVERY GUARANTEE!**

# V13 MODEL

## TECHNICAL DESCRIPTION

### V13 MODEL

Our most powerful and high-performance sweeper will prove to be infallible for all your daily sweeping operations.

Designed for the most demanding applications, the V13 sweeper has -as indicated by its name- 13 rows of brushes: 8 straight rows, 3 rows with a V-shape at the front to collect rubbish into the centre and 2 mini-rows at the very front of the "V".

6 widths available, ranging from 1500mm à 4800mm

#### Most frequent applications:

AGRICULTURE

PUBLIC WORK  
PUBLIC ROAD

RECYCLING

READY-  
MIXED  
CONCRETE

MATERIALS

### V9 MODEL

Our mid-range sweeper, still very powerful, efficient and reliable. First class product for numerous sweeping operations.

Designed for demanding applications, the V9 sweeper has- as indicated by its name- 9 rows of brushes: 4 straight rows, 3 rows with a V-shape at the front to collect rubbish into the centre and 2 mini-rows at the very front of the "V".

6 widths available, ranging from 1500mm à 4800mm

#### Most frequent applications:

LANDSCAPES

EQUESTRIAN CENTRES

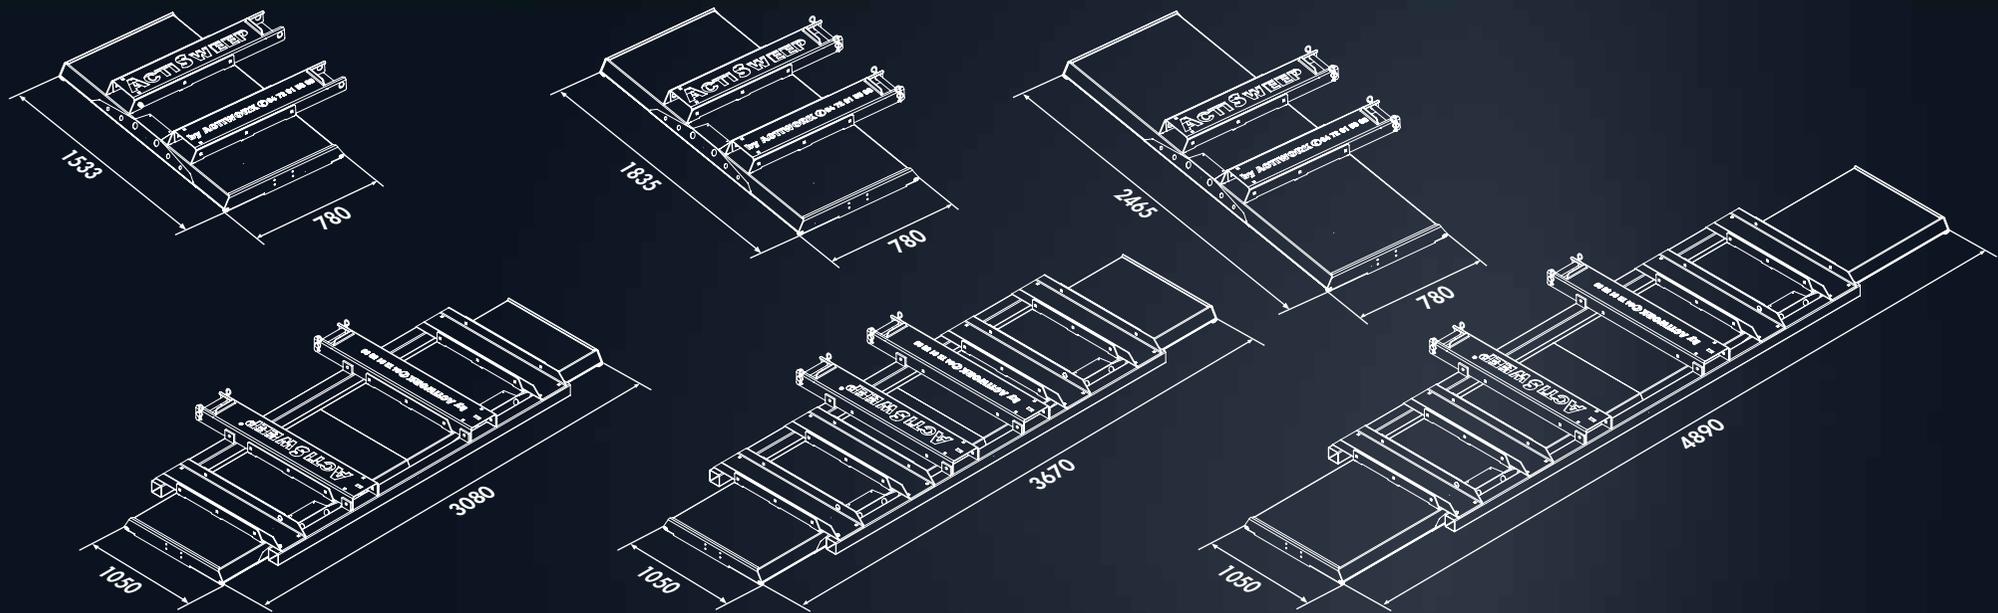

SNOW REMOVAL

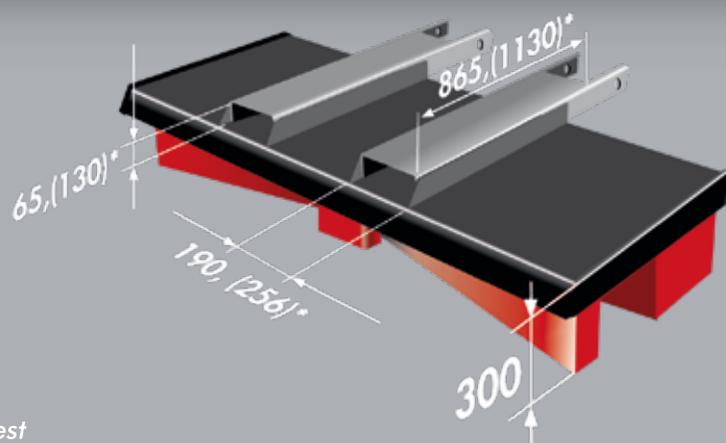

MUD/SLUDGE REMOVAL

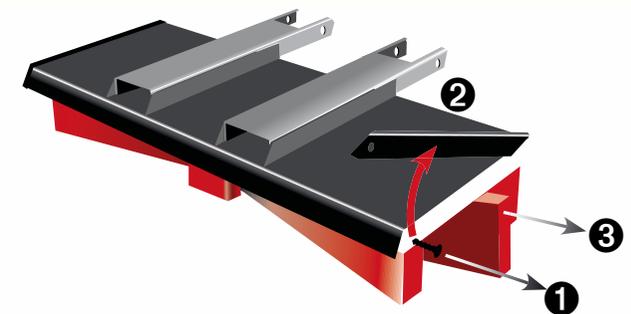

# SPECIFICATIONS

**BRUSHES EASY TO REPLACE**

\* Available on request

- 1- Unscrew a bolt on each connector
- 2- Lift up the connectors
- 3- Remove the brushes

## STANDARD FORKS

- ↳ Adaptation for forks on forklift trucks
- ↳ Suitable for all types of forks with dimensions smaller than 256 x 130 mm
- ↳ 2 inserts with wedge pins for fast connection of the sweeper to the forks
- ↳ Heat-galvanized steel design

## STANDARD BUCKETS

- ↳ Universal version for standard buckets and forks
- ↳ Suitable for all types of buckets and forks
- ↳ Consist of 2 steel parts connected to the standard forks adaptation
- ↳ Heat-galvanized steel design

## BALE GRABBER

- ↳ Universal version for bale grabbers and forklift forks
- ↳ Suitable for all types of grabbers and forks
- ↳ Heat-galvanized steel design
- ↳ Dimensions:  
L 1055 x I 700 x H 700 mm
- ↳ Inserts for grabber, maximum dimensions: height 525 mm and thickness 90 mm

## LOADER (ALLIGATOR CLIP BUCKET)

- ↳ Universal version for buckets and forks
- ↳ Suitable for all types of buckets and forks
- ↳ Robust design in thick galvanized steel
- ↳ Can be connected to the standard fork version

# ADAPTATIONS

## 3 POINT ATTACHMENT

- ↳ Universal version for tractors
- ↳ Direct attachment to traditional 3 point systems
- ↳ Equipment assembled on the standard forks adaptation, so that the sweeper can also be used with forklifts
- ↳ Heat-galvanized steel design

## LATERAL TRAVELLING KIT

- ↳ Forklift version  
Suitable for all types of forks
- ↳ Easier sweeping along walls or edges, especially when the vehicle is larger than the sweeper
- ↳ Heat-galvanized steel design

## FRONT-END LOADER

- ↳ Fast attachment for all types of front-end loader (compatible with Mailleux, Fauchoux, Stoll, Quick...)
- ↳ Standard forks adaptation, so that the sweeper can be used with forklifts
- ↳ Heat-galvanized steel design

## CUSTOM ADAPTATIONS

- ↳ ACTISWEEP can provide on request special custom adaptations to assemble the sweeper on your vehicle according to your needs

### STORAGE LEGS

- Allows to lift-up the sweeper so that the brushes do not sag under the weight of the structure
- Allows to store the sweeper on a rack for more stability
- Heat-galvanized steel design

### ANGULATION KIT

- Forklifts version, suitable for all types of forks
- Heat-galvanized steel design
- Allows to give an angulation to the sweeper in order to evacuate floor sweepings on the side (ex: snow removal or when sweeping roads or large areas)
- 10 fixed positions over 360°

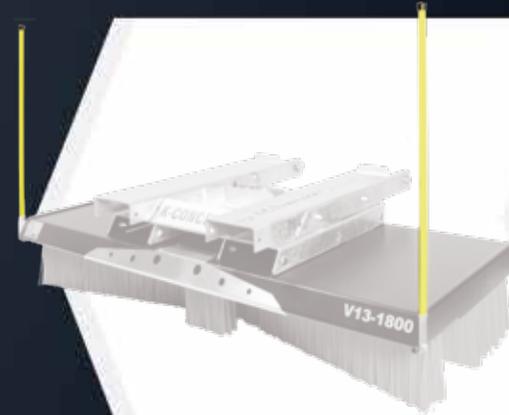

### STRENGTHENED FRAME

- Thick steel frame protecting the sweeper on its edges
- Provides frame protection in the event of an impact
- Robust heat-galvanized steel design
- Has inserts for forks, maximum dimension 190 x height 68 mm

### SIDE VISIBILITY STICK KIT

- 2 sticks (length: 1000 mm) to be fixed on each side of the sweeper
- Allows a better assessment of the size of the sweeper in order to avoid side impacts
- Fluorescent yellow sticks for a better visibility

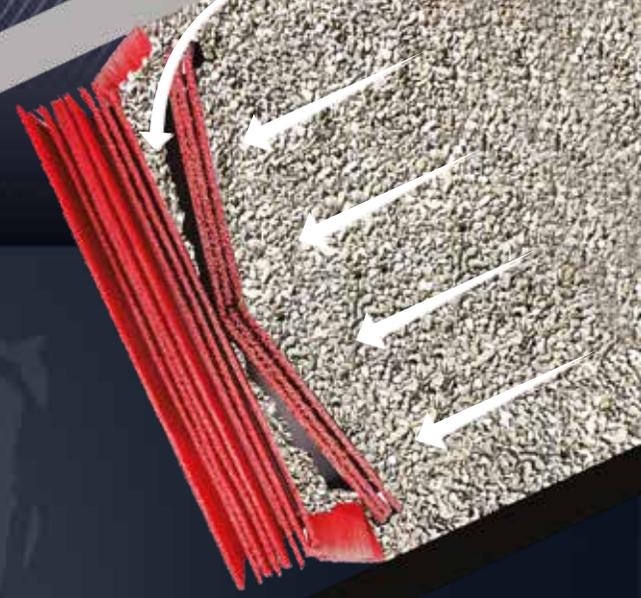

## OPTIONS (V13-V9-V7)

### ANTI-SCATTERING KIT

Allows :

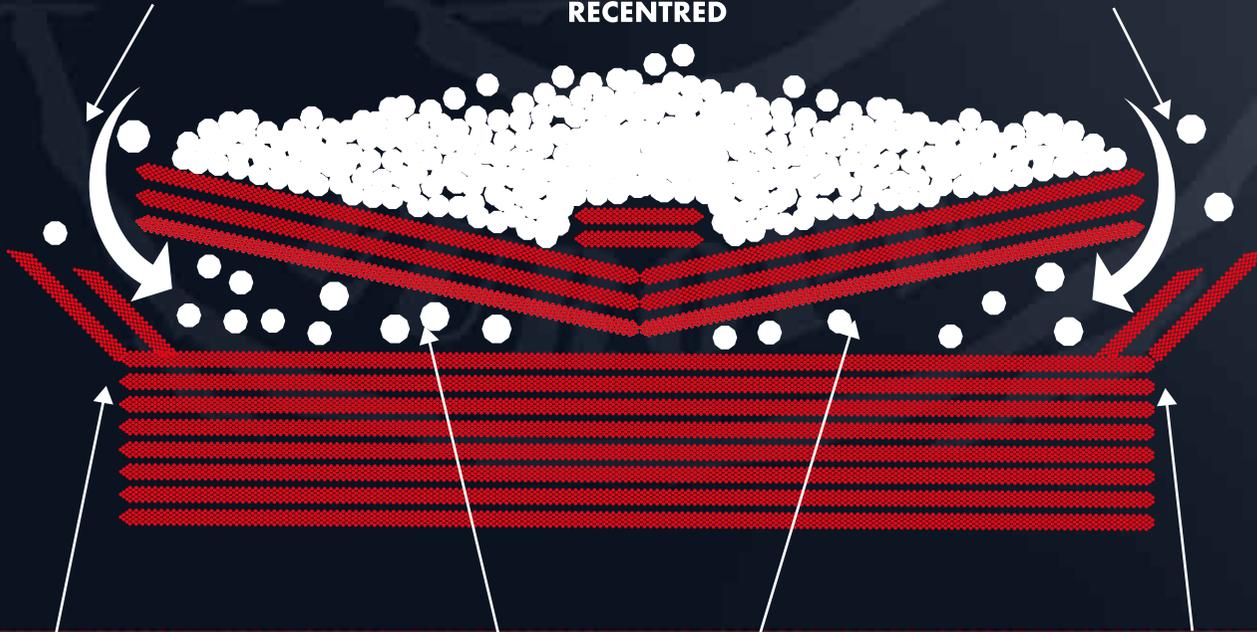

- An easier sweeping along walls and sidewalks
- Materials to be collected in a second space when the "V" is full, thus doubling the retention capacity! No more windrows! This innovation is patented.

**EXCESS MATERIALS ARE COLLECTED**

**MATERIALS ARE RECENTRED**

**EXCESS MATERIALS ARE COLLECTED**

**ANTI-SCATTERING SIDE BRUSHES**

**SECOND COLLECTION SPACE**

**ANTI-SCATTERING SIDE BRUSHES**

■ Avoids a lot of manual work, especially along walls and sidewalks

■ Allows to collect materials in the space located behind the "V"

■ This option is to be assembled at the back of the metal connectors located on each side of the sweeper, thus protecting it from any distortion in the event of a side impact.

**WALL**

NEW (V13)

## FINISHING BRUSH

This innovation makes it possible to obtain a higher quality sweep than standard bristle (red) thanks to its very thin bristle. For example : sawdust, sand, dust (such as cement, flour, potato...).

This option is only made of 5 rows of brushes. It is available on all widths but only useful on the V13.

**1 ROW OF BRUSH  
WILL BE PLACED IN 3<sup>RD</sup> POSITION IN THE V-CONCEPT**

**4 ROWS OF BLACK BRUSHES  
WILL COME BEHIND THE RED ROWS**

**EFFECTIVE DOWN TO THE DETAILS**

## V7 MODEL

This sweeper is the first range product.

Designed for simple applications on smooth surface (wheat, snow, aggregate...), the V7 sweeper has as indicated by its name 7 rows of brushes: 3 straight rows, 2 rows with a V-shape at the front to collect rubbish into the centre, and 2 mini-rows at the very front of the "V".

3 widths available: 1500mm and 2400mm.

This model is only available on pallet fork and the only option available is the anti-scattering kit.

### Most frequent applications:

**WHEAT**

**SNOW**

**LOGISTIC**

**GARDEN  
MACHINERY**

**SAWMILL**

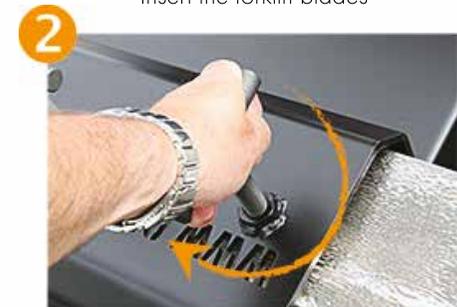

**MATERIALS**

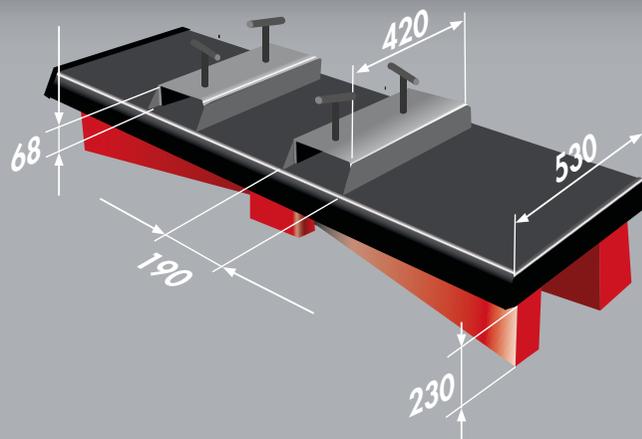

**READY FOR USE:  
5 TO 10 SECONDS ARE ENOUGH**

Insert the forklift blades

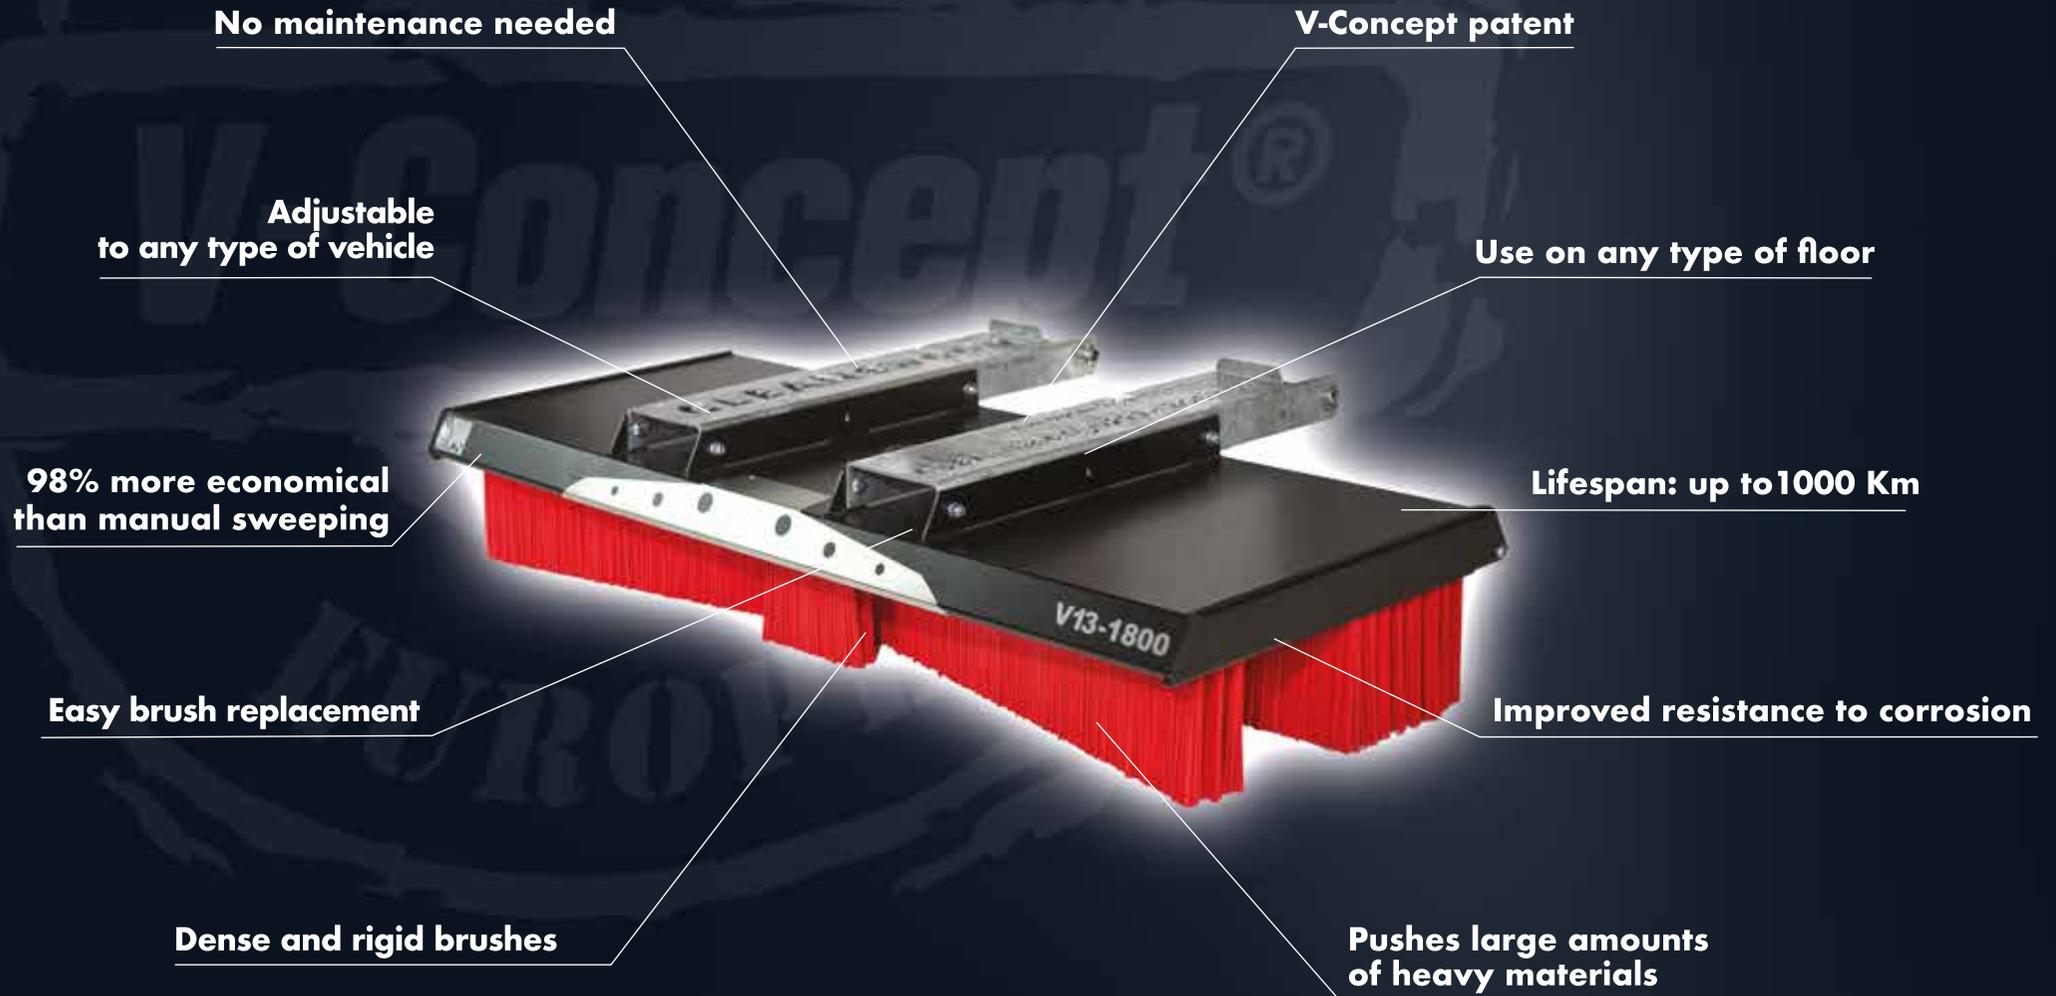

Block it, drive along and it's clean

**3 WIDTHS AVAILABLE: 1500, 1800, 2400MM**
